Okay, I will be gone that week and April 7 week, but I back in the next week (April 21). So, I will work on getting together with Lisa to do the flow measurements at the adits. We'll talk between now and then.

We are targeting week of April 14. All dependent on weather and access to a pup car driver.

Dan - we can come up w an Isco if needed.

The diel effects are worth a look, but I believe we need to have some engaging discussion w Rob and maybe Mike W do convince ourselves ?

Btw - when are you thinking of going down to Silverton to place samplers. I would to go to help but also need to pull samples at two adits (Lisa and I would do that).

Talk w you later.

Steve

Thanks Steve

I think we are on the same page.

We are exploring the use of a USGS ISCO sampler co-located with the mini-sipper for comparison purposes so maybe we could also borrow it to put out at A68 when we are there in the Fall. Do you have access to an ISCO if that falls through?

Dan,

Deliberative Process/Ex. 5

Those are my thoughts. I have one more day in our training week....
